

Meeting #543

CAPISTRANO BAY DISTRICT
AGENDA REPORT
December 2, 2008

Security Activity Report

ITEM F.3

Discussion Regarding the Addition of More Street Lights

A request of the City for street light information resulted in receipt of four pages of the County of Orange Street Light Standards and Specifications. During the month of December staff will get the specs on the existing street lights on Beach Road then evaluate the system against the specs provided by the County. Without having to spend a lot of money upfront for an engineering consultant we should be able to get a sense of whether our existing system is substandard or adequate and what should be added to bring it up to today's standards. At some point down the road however, a professional should be used to verify our homework and make sure our evaluation is accurate.
