

Meeting #548

CAPISTRANO BAY DISTRICT
AGENDA REPORT
April 28, 2009

Security Activity Report

ITEM F.2

Progress on Installation of More Street Lights

Staff will be submitting the District's request to Sempra Utilities on Monday, April 27 to make the proposed changes to the street light system.

Sempra will accept a set of marked up parcel map pages showing the location of every power pole and street light by address and power pole number along with a cover letter officially requesting the proposed changes. Sempra will then evaluate a fixed cost that we will have to approve prior to scheduling. Once approved, a schedule is set and staff understands the actual work could come in late June or early July.

In an effort to balance the illumination, the proposed layout of street lights will provide a light fixture no further apart than 240 feet. Street lights specs for local streets call for a light every 300 feet so our proposed layout (which is dictated by the existing power pole layout) will be a bit tighter and is expected to fill in the currently existing dark areas.
