## **ITEM 13**

### Undergrounding Utilities – Refocus on Next Steps

The Board's efforts with progressing on the issue of undergrounding utilities ended up at somewhat of a dead end during the discussions with Greenfield Communications regarding fiber optic cable for Beach Road. The owner of Greenfield apparently had a staff member with his firm that was formerly employed by AT&T and had experience with undergrounding utilities.

The possibility of making progress through Greenfield on this topic never materialized as the issue of fiber optic service never came to anything.

Board President Masto has requested this item be revisited so the Board can reexamine the topic once again.
