

Meeting #620

CAPISTRANO BAY DISTRICT  
AGENDA REPORT  
March 29, 2016

---

*Old Business*

## **ITEM 8a**

### Geologic Hazard Abatement District

The District will have a guest speaker at the Board meeting to begin a discussion and community conversation about Geologic Hazard Abatement Districts or GHAD's – what they are, how they work and how this might benefit our efforts at shoreline protection.

Speaking at the meeting will be Dr. Jeff Adams of *ENGEO, INC.*, a firm of engineers, geologists, environmental scientists and hydrologists. As specialists in providing geotechnical engineering, environmental engineering and engineering geology, *ENGEO INC* also specializes in developing Geologic Hazard Abatement Districts.

Since joining *ENGEO* in 1999, Dr. Adams has provided environmental and geotechnical expertise on major development and public projects, as well as financial and cost benefit analyses. He leads *ENGEO's* entitlement and permitting support services and leads programs for Geologic Hazard Abatement Districts.

Included on the following page is a brief summary and explanation of GHAD's.
