

Meeting #633

CAPISTRANO BAY DISTRICT
AGENDA REPORT
June 27th, 2017

Old Business

ITEM 9b

Landscaping Report

Since the last board meeting several measures have been implemented to improve the look and health of the landscaping around the community entrance.

Accent Lighting – all 35W halogen bulbs have been replaced with 6W LED bulbs
All light fixtures have been cleaned and moving parts oiled
Several fixtures have been repaired back to operating condition

Fertilizing – this was done in mid-April, which combined with increased watering, has resulted in a greener and healthier-looking landscape

Irrigation – the bamboo and kentia palms along the sidewalk are now getting water everyday
All other areas are now being watered every other day

New Plants – (during the next two weeks)
Variegated flax will be planted in the planter dividers in the overflow parking area
Apaganthas, new philodendrons and some pygmy date palms will be planted along the sidewalk from the flame bowl to the wood bench
