Security Reports

ITEM 6b

SPEED BUMP IN 600-BLOCK and MISC. ITEMS

The Board approved the installation of an additional set of rubber speed bumps, called 'speed cushions', placed in the roadway adjacent to 35615 Beach Road. This is in response to complaints of speeding along this stretch of roadway. The material has been delivered and will be installed on Friday 10/27.

Miscellaneous Security Items

Call-in Password for phone calls to guard shack

All security officers have been reminded that it is required security procedure to request the password from homeowners to confirm their ID when calling the gate even when the caller's voice is familiar and recognizable.

Verify Authorization for UPS/Cox/SDGE/Amazon/Etc

Standard procedure for gate officers is to verify driver ID, company affiliation and capture the vehicle license plate. The license plate number is essential in case the other ID information turns out to be fraudulent and a criminal issue arises.

Electronic Patrol Check-in Stations throughout the Community

Securitas has installed a system of electronic check-in stations along the roadway to ensure that patrol officers are touring the entire road on a regular basis. By using a special application on the security smart-phone, the program logs in the date/time of the officer's visit to that location and retains the site data that is easy to follow by supervisors. This program will be of special benefit during the late night and early morning hours to see if the officers are truly patrolling.

Pick up Old Newspapers on Driveways

All security officers have been reminded that old newspapers cannot be allowed to accumulate on homeowners' driveways as it is an indication that someone is not present at the home.

Utility Spotlight for Patrol Vehicle

Both the District's Police Vehicle and the Securitas Patrol vehicle are equipped with forward-facing and side-facing 'alley lights' on the respective light bars that are activated from within the vehicle. These lights are intended for illuminating shadows and other dark areas at night where trespassers might try to duck out of sight when the security vehicle is approaching.
