ITEM 9b

Obstruction in Storm Drain No. 12 at 35595

The opportunity to make use of the services of a local drilling company here in San Clemente has not worked out. However, in speaking to that company this week, staff did get a referral to an industrial hydrojet company that feels their equipment is up to the task.

Every effort will be made to pursue this new contact to get the drain pipe back in working order as soon as possible.
