

Meeting #659

CAPISTRANO BAY DISTRICT
AGENDA REPORT
January 28, 2020

Security

ITEM 6b

Security Camera with Integrated Sound-capture

At our previous meeting, the Board requested we look into retrofitting our security surveillance camera at the guard shack with a unit that will record sound along with the video capture. The purpose being to record the rude, condescending and vulgar language and threats being shouted at our gate officers by guests who become upset when things don't go their way.

Our current security camera system is now outdated and obsolete due to advances in the technology. This means changing out one camera is not going to be so easy. We are looking into how we might be able to short-cut around the technology without having to change out all the cameras and the DVR unit all at the same time.

Research and pricing has not been worked out yet so this item will have to wait, possibly until next month while we work out a solution and a cost.
