Security Rprts

## ITEM 6b

### Late Night Trespassing at South End of Beach Road

Security has revised the schedule for the extra daytime patrol officer to be on patrol in the community generally from 8:00 PM through to 4:00 AM the following morning. The intent is to have additional presence in the southern part of the roadway where it is believed individuals are coming over the wall at night and 'fishing' for unlocked cars or open car windows.

Vehicles are rarely actually 'broken into' as in busted glass – it's primarily a hunt for unlocked cars which present an easy and silent opportunity to a thief.

Additionally, security is meeting with Allied Universal Technologies Dept. on Monday July 27<sup>th</sup> to explore how to establish a system of wireless surveillance cameras on the block wall line. This technology allows for remote but instant detection that transmits by satellite to a central command post OR can be set up to transmit directly to our operations right here in the District.
