

CAPISTRANO BAY DISTRICT
AGENDA REPORT
July 29, 2008

Committee Reports

ITEM H.1

Revised MHTL Survey Program

At the previous Board meeting action was taken to revise the current beach survey program as follows:

- increase the number of survey measurement stations (transects) from 13 to 21
- reduce the number of surveys per year to once (in June at the start of summer)
- reduce the annual survey fees from \$8000 to \$6000

The survey engineer, Paul Cuomo of Guida Surveying, has been notified and the changes will be implemented during the first week of August. This season only, the District will miss the regular June survey. With notification of the change, the surveyor was not able to reschedule until August.

ITEM H.2

QLC Committee Report

Information on this item is limited to the question of whether to close the ad-hoc committee activity or have the committee continue functioning in the area of renter and property owner relations. *There is no background report.*
