## **ITEM 9a**

### Shoreline Protection Advisory Committee Report/Community Survey

The Committee has completed its Zoom meeting presentations and has circulated the online survey for polling our property owners to gauge their support for establishing a *special parcel tax assessment*.

As of Thursday, May 25th, the District has received a total of 109 returned surveys, of which 93 have responded YES for the special parcel tax and 13 have responded NO, although some of the NO's are asking for more clarification and have questions while a few are definitive NO's.

This doesn't account for the total Beach Road population but is a higher percentage of response from homeowners than the District has ever seen on any similar canvassing effort, and while this is a good indication for support, District staff is going to have to begin phoning those property owners that have not responded.

On that note, a phoning list has been created to call owners in the following order:

- those who've requested a callback for further information
- those who are registered to vote on Beach Road but did not return the survey
- lastly, all others whom we've not heard from

Phoning to property owners will begin on Tuesday, after the Memorial Day weekend.
