Security Report

ITEM 8c

Disposition of District Police Vehicle

The District's police vehicle markings were changed back to *SECURITY* when it was brought to our attention back in February that our police powers had been removed by LAFCO – *see attached photo*.

In anticipation of retaining our police officer in a new position as Security Operations Manager, and at the request of the Dana Point PD, we had the vehicle lettering revised – only to learn that our police officer was intent to continue working in law enforcement in some capacity elsewhere.

Now that we have this additional vehicle that's been nicely marked up, the recommendation is to retain the vehicle as a District utility truck, keep the amber light bar for emergencies but remove the *SECURITY* lettering and make good use of it as a general use District vehicle.

Driving the pickup in the community with the word *SECURITY* on it may result in some misunderstandings about the vehicle's purpose.

The other option would be to remove all artwork, lettering and lightbar and sell it.
