## **ITEM 8c**

### Proposed Sale of District Police Vehicle

With the cancellation of the District's Police operations, it was originally thought that the leftover vehicle may serve a useful purpose as a secondary security vehicle.

In the months since the change was made, the vehicle has not been driven once and it appears it may never get used.

AUS is not insured to drive other vehicles and even if we worked out an auto insurance arrangement, there is still risk exposure. It doesn't seem cost effective to run this risk for the random times it may get used.

The recommendation is to strip the decals, remove the police equipment (siren, light bar and on-board radio), sell those items separately, then sell the pickup. Perhaps turn the proceeds into an electric golf cart.
