

CAPISTRANO BAY DISTRICT
AGENDA REPORT
APRIL MEETING
October 28, 2025

Shoreline Committee

ITEM 7a

Miller CDP Application Status

With all corrections now complete and the Staff Report finalized, the CDP application was submitted to the City Attorney's office on Friday, October 24th. Next step is the Planning Commission Hearing, on the schedule for Monday, December 8th. Once the Commission members have received the Staff Report, it will be to the Committee's advantage to meet with the individual Commissioners to walk them through the details of the Permit ahead of the hearing so they have a clear understanding of the scope of work proposed in the permit application.

ITEM 7b

Report on Smart Coast California Conference

Topics of discussion at this year's Smart Coast California Conference are summarized as follows:

- Surflife Cameras on the beach to record the surfzone environment for wave action, measuring bathymetry, weather, tidal flows, people counting
- Vulnerability of California's beaches to climate change/UC Santa Barbara Study
- Humboldt Bay sea level rise issues/CalPoly Humboldt State University
- Dr. Kate Hucklebridge Executive Director of the Coastal Commission, discussed Sea Level Rise adaptation planning (note that there were no comments about the current public concern over the time it takes for CCC staff to process permits)
- Legal Pathways for streamlining Housing permits and Disaster Recovery/Brownstein Hyatt
- Accelerating Coastal Resilience speaker from Coastal Quest

**Access to the meeting recording will be available soon but not at this time – it has not been posted yet.*
