ITEM 8b

Guest Access Control System

The new GoAccess gate management system is expected to be accessible by residents on Monday September 14th. DwellingLIVE has been given their 30-day notice of cancellation, effective on September 30th which allows for a two-week overlap of access to both systems for resident convenience in making the transition.

We are asking residents to go through their DwellingLIVE files and purge old and outdated information for guests, service workers, and vehicles. When the time comes to conduct the actual upload of resident data, whatever is on file in DwellingLIVE will get imported into the GoAccess database and it would be great to start out in the GoAccess database with as much current and relevant information as we can create. However, any data not updated by owners will get moved over to GoAccess automatically.

Admin assistant Karen Morris can say more about this at the meeting.
